

1. white-space: normal. This text has some extra spaces in front which are also ignored by relative positioning.

2. white-space: pre. This text also has extra spaces in front but these do not get ignored by white-space: pre.

3. white-space: nowrap. The extra leading spaces are ignored by relative positioning. New line is ignored

4. white-space: pre-wrap. Leading spaces count for relative positioning.

5. white-space: pre-line. The leading spaces will not get ignored for relative positioning.

6. white-space: break-spaces. Here leading spaces are counted for relative positioning
